Paths to Your Past

In the nineteenth century, the Great Lakes were strategic waterways that aided Americans moving west and immigrants coming from overseas through Canada to settle and develop the Midwest. Cheap land, mining, and the timber industry made the area attractive. Water power from rivers and rapids and access to grain and lumber furthered Michigan's growth. The cereal and furniture industries, breweries, and ultimately, automobile manufacturing brought wave after wave of migrants from the South and immigrants from abroad. During the second half of the twentieth century, manufacturing slowed down and many left Michigan, moving west and south.

These migrations inspired our conference program, Paths to Your Past. The program will focus on ancestors' migration paths with an emphasis on the states that border the Great Lakes. Some lectures will enhance your proficiency as a researcher and your methodological and analytical skills. Other presentations will broaden your understanding about your ancestors' ethnicity,

occupation, religion, military experience, economic status, and associations. In addition, the program will also feature tracks that highlight DNA and technology.

Registration for the NGS 2018 Family History Conference, including tours and events, will begin 1 December 2017 at <http://conference.ngsgenealogy.org/>.
